WATERCOLORS Base Drops uses the latest direct dye technology to create an extreme color that will blow your mind! It can be used to tone blondes, touch-up uneven or faded color or it can be used to create an all-new hair color. The best part is that the Base Drops are easy to use and it only takes 3 minutes to do!

Just add the Base Drops to your daily conditioner and you'll be stopping traffic in no time! You can also add it to styling aids and gels for a more contained concentration. Love WATERCOLORS Intense Shampoo? Add some Drops to it for a more intense color.

### Coloring Directions:

After shampooing your hair, put some of your daily conditioner into the palm of your hand. Add as few or as many BASE drops to it, based on the INTENSITY of the color you desire. Using 1-3 drops will deposit a pastel color, while adding more creates more color intensity. Mix well before applying to your hair and work through evenly. For best results allow the product to sit on hair for 3 minutes or more, but wash hands immediately after application. Best results will show on pre-lightened hair. Use product carefully to avoid staining.

### Toning Directions:

After shampooing your hair, put some of your daily conditioner into the palm of your hand. Use 1-2 drops of silver for toning. Mix well before applying to your hair and work through evenly. For the best results allow the product to sit on your hair for 3 minutes or more, but wash hands immediately after application.
