**IZUTECH<sup>®</sup>**  
in-dis-pen-sa-ble [in-di-spens-sə-bl]

**IZUTECH® VULCANN MX** is the state-of-the-art dryer that boasts exceptional power and performance wrapped up in an ultra-lightweight package less than 1 lb in weight. Its strong airflow and high heat rapidly dries all hair types and textures and styles the hair in an instant!

**Feather Weight**

This professional dryer weighs under 1 lb, eliminating stress on the stylist's shoulders and back.

**3 Heat Settings**

Super-hot (80°-240°F), quickly dries all textures of hair. The light indicator shows clearly what temperature you are working with.

**Smart BLDC Motor**

The brushless BLDC 1875W motor spins at an incredible 110,000 RPM and offers three air flow settings. It spins faster than a traditional AC dryer and can last five times as long. Up to 10,000 hours!

**Shine Generator**

20 million negative ions help seal the hair's cuticle layers, producing a healthy and silky appearance with unsurpassed shine.

**2 Magnetic Nozzles**

2.00 & 2.50 inch magnetic nozzles and hair diffuser are perfect options for all styling and smoothing needs.

**Silicon Sleeve**

The unique sleeve allows the stylist to safely hold the dryer in different positions, reducing bodily stress while maneuvering across all textures and lengths of hair.

**3 Air Filters**

The micro filter and two additional filters make it almost impossible for the hair to tangle in the dryer.

**Reverse Air-Flow Cleaning Mode**

Self-cleaning reverse air flow removes any buildup of dust, product, or hair in the dryer that might affect performance. This helps extend the life of the dryer.

**Cold Shot**

This feature fixes all styling techniques and hair shapes.
