Colourage

PERMANENT HAIR COLOR

Buy 12 Colourage Permanent Hair Color RECEIVE 1 COLOURAGE DEVELOPER OR PROCESSING CREAM FREE

Colourage features **59 shades** plus 4 Concentrates, a Blonding Booster, and a Glosser. It is an easy-to-formulate system with a gentle, low-ammonia formula. It is economical—mix 2 oz. of developer with every 1 oz. of color.

There are two developer choices: **Processing Cream**, a thick, "stays-where-you-put-it" cream for bowl and brush applications, and **Colourage Developer**, which is great if you prefer bottle application.

5 Easy Steps to Formulating

1- Assess natural level and gray percentage using the Natural Series in the Colourage Swatch Book. **2-** Select the desired level and tone. | **3-** If lightening, consult the RPC Chart for the underlying pigment at the target level and decide whether to enhance or neutralize it. | **4-** Use the Color Wheel and Tonal Series Base Chart to select the appropriate shade. | **5-** Determine developer strength and processing time according to the accompanying guide.

\$7.78 EACH TUBE

PRO TIP

When hair has been lightened more than two levels beyond the target depth, apply a repigmentizing filler to restore the underlying pigments identified by the RPC Chart. Tressa's Colourage Color functions effectively as a filler; select appropriate shades, conduct a strand test, and process on dry hair to achieve balanced tonal results before the final application.
